TNT Manufacturing Vision Statement

Our mission is to efficiently design, develop and manufacture high quality, reliable, innovative products, processes and services that meet or exceed our customer’s expectations in a fair, competitive and ethical manner. Our high quality saves you money by providing low total ownership costs.

TNT Manufacturing Mission Statement

At TNT Manufacturing our mission is to provide our food processing industry customers with superior solutions that impact production, making customers more competitive and profitable. Our commitment is to provide high quality equipment and professional services backed by years of industry experience. We base our success on achieving excellence in customer satisfaction and creating a continuous improvement climate for both our employees and our product offerings through customer support.

TNT Manufacturing Industry Introduction

TNT Manufacturing was created in 2008 as a result of the reorganization and sale of several major food processing equipment suppliers. This included the acquisition of the Kusel Equipment Company’s food processing equipment line. This included selective equipment formerly produced by Starr Incorporated for many years. The closure of Hughes Equipment in 2019 has added additional offerings including full green bean lines, sweet corn lines and fully integrated ready to cook processing lines.

TNT Manufacturing sells and supports existing production equipment and parts from these companies and also provides equipment redesign and value-added engineering to maintain the equipment as a valuable resource for our customers.

TNT employees and representatives have extensive experience in many areas of the food processing industry and can recommend money saving ideas and process modifications for our customers. We have experience working with and supplying customers from all around the world.

Some of the many industries we supply high quality, custom equipment and solutions for are:

Citrus	Nut	Root Crop
Fresh Market	Pasta	Seed Corn
Fruit	Processed Food	Snack Food
Meat	Ready to Cook	Vegetable

TNT Manufacturing supplies engineering services including: drafting, equipment design or modification, labor reduction systems and process line layouts. We work with the customer and our partner vendors to integrate all of your equipment needs into a complete, high performing processing line.
