MODEL 580, MODEL 560 & MODEL 540 PEELER/WASHER

Featuring the

ALL-HYDRAULIC DRIVE SYSTEM

*and the patented
4,237,782*

MOBILIZER

Peels, Scrubs, or Washes
fruits and vegetables

MOBILIZER

Creates positive tumbling action and dwell time control, insuring even treatment of product. This reduces peel loss.

CONSTRUCTION

Sturdy, stainless steel throughout, insures long life. Quick change rolls for simple maintenance and minimal downtime.

PEELER/WASHER

Is the originator of total hydraulic drive Peeler/Washers. The hydraulic drive provides easy adjustable roll speed and mobilizer speed with positive fingertip control. Available with abrasive rolls or brushes as required.

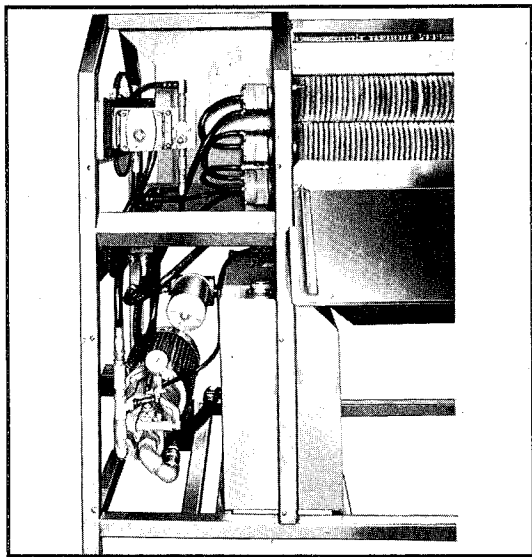

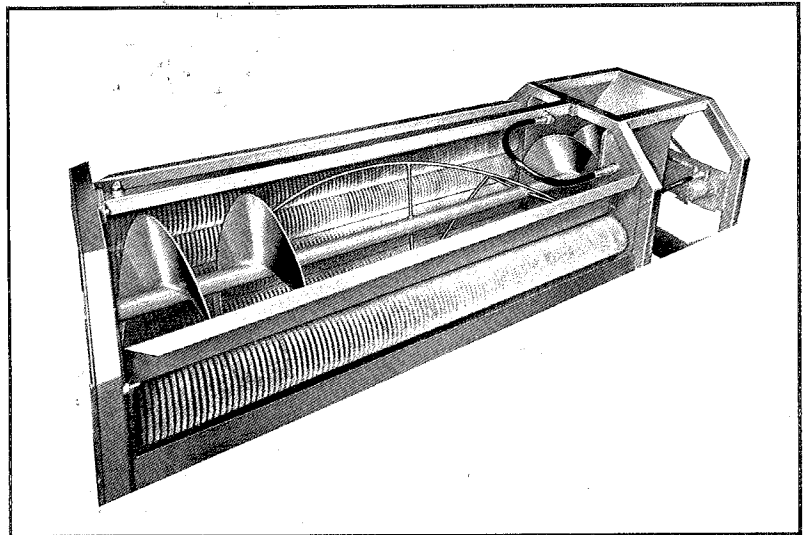

SANITATION

Continuous welds eliminate cracks and crevices for easy cleaning. Cleanout doors are situated to allow easy access for washdowns.

PEELER/WASHER

MOBILIZER *(Patented)*

A uniquely designed insert. Lengthens life of peeling rolls. Reduces water usage, when water is used. Exclusive helical-shaped rods generate unique positive tumbling action of product, insuring uniform product conveying, level, and discharge. This process increases production efficiency while reducing energy use.

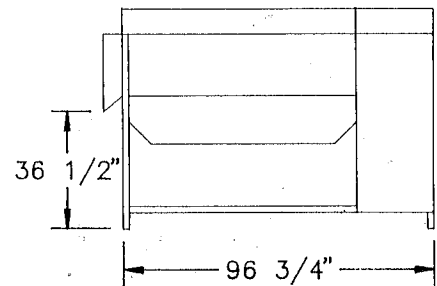

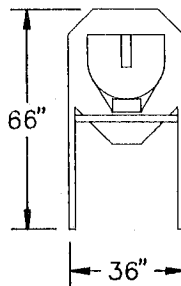

ALL-HYDRAULIC DRIVE

System has positive fingertip speed control for simple speed adjustment on the rolls as well as the Mobilizer shaft. Drive system carries the drive-end of the rolls, therefore, the bearings are continuously running oil.

SPECIFICATIONS

Inlet Height	66"
Overall Length	96 3/4"
Disc. Height.	36 1/2"
Overall Width	36"
Inlet Opening	16 1/2" w x 20"
Motor	10HP, 230/460 Volt, 3 Phase, 60 Cycle.
Water Consumption	0-30gpm.
Water Connection	3/4" NPT
